OP30 | Citrus, kiwi & mango Peeler

Ripe for Success.

How it works:

OP30 is a semiautomatic peeling machine for citrus (orange & grapefruit), kiwi and mango. The machine can be used to peel one fruit variety at the time or even two separate fruit since it is equipped by two peeling head. When processing citrus fruit or kiwi the speed rate is 30 fruit x minute, while the speed it's reduced to 24 fruit x minute when processing mango. Fruits are positioned manually into the feeding cups by one operator, if processing citrus a coring option is also available. Two self centering hand will center and transfer the fruit between two mandrels, these will put in rotation the fruits to allow their peeling. The ABL patented peeling head will gently perform the peeling following the fruit shape according it's dimension with the possibility to adjust the peeling depth also with the machine in function.

Features and benefits:

- Processes up to 30 pieces/minute
- Adjustable peeling depth using ABL patented peeling system
- Self-adjusts for different fruit shapes/types
- High yield rate: 50% and up on fully peeled fruit
- Reliable and robust performance for industrial and non-industrial processes
- Maximizes productivity while reducing production costs

Once peeled two blades will remove the two extremity (not for mango) and then release the fruit onto the peeled fruit conveyor. Following this ABL can also offer Mango destoning equipment Mod MNG24, mango or kiwi cutting machine Mod. TKM as well as citrus slicer Mod OS8/OS10.

Performance and support:

Every ABL machine is engineered to set new standards for performance and efficiency. From operator safety and process automation to contamination control and fruit-quality safeguarding, our machines are designed to improve the elements that matter most to our customers.

ABL also offers ongoing training to help owners maximize machine performance – from start-up throughout the machine's entire life span. Training sessions are periodically organized and can also be held at ABL headquarters.
