TRA | Pineapple slicer

Ripe for Success.

How it works:

TRA is a semiautomatic pineapple ring cutting slicer.

One operator to feed the peeled and cored pineapple into a rotating fruit holder.

During the rotation, pineapples will meet the blade system, cutting then the fruit perpendicular to the core to the previous agreed thickness.

At the end of the rotation the fruit is discharged onto a lower conveyor cut in perfect slices.

Features and benefits:

- Processes as many fruit as operator can introduce in the machine in one minute
- Uniform cut thickness
- Reliable and robust performance for industrial and non-industrial processes
- Maximizes productivity while reducing production cost.

Performance and support:

Every ABL machine is engineered to set new standards for performance and efficiency.

From operator safety and process automation to contamination control and fruit-quality safeguarding, our machines are designed to improve the elements that matter most to our customers.

ABL also offers ongoing training to help owners maximize machine performance – from start-up throughout the machine's entire life span. Training sessions are periodically organized and can also be held at ABL headquarters.
