HOME DECOR  
Lookbook 2021-2022

2020 has been a very hard year for all of us in all senses.  
But our responsibility with our clients, collaborators and  
artisans made us take the challenge as an opportunity.  
Creation process never stopped and the result is this  
new lookbook presenting the best of our artisans hands.

Elegant pottery from Chulucanas, extra soft alpaca textiles for the house, modern copper accents and a big array of wall art, are combined with the purpose of bringing our customer's homes only high quality products made in Peru with local materials.

Our vases and plates are hand thrown in Chulucanas, a northern village in Peru, where potters use precolombian techniques to produce modern artefacts.

Coming from the Highlands of Peru, Alpaca fiber is the softest material for throws, pillows, curtains, upholstery.

Our mirrors are inspired in the colonial ones and transformed into contemporary pieces of wall art, gilded or colourful.
