Basil  
White Quinoa  
Red Quinoa  
Black Quinoa  
Quinoa with Vegetables  
Organic Quinoa

# Our fields and facilities

Strategically located in the extensive areas of Viru, Tarapoto and Chinchá, reducing the risks of climate variations and optimizing the quality of our production processes.

## WE HAVE A REAL COMMITMENT with quality and food safety

Our vision is to be the preferred manufacturer of premium quality foods and brands in the world.

Our Quality Assurance System is designed to prevent and control food safety risks that may arise when cultivating, processing or distributing the ingredients.

# Improving the community's life quality

## INNOVATIVE BY NATURE

We are able to supply the world's most demanding markets based on four pillars: research, implementation, investment in new technologies and quality.

## Social RESPONSIBILITY

Improving the community's life conditions and services (schools, parks, pipelines, security).

- Health campaigns.
- Supporting smaller farmers with knowledge, resources (e.g. seeds, fertilizers) and positive programs (e.g. Fairtrade).
- Constant training of our people.

## Environmentally RESPONSIBLE

We have developed a responsible water-use program because we know it is a scarce resource in the planet.

We have a modern drip irrigation system that supplies water and nutrients to our crops. Likewise, we have implemented automated flushing systems.
