SOFTWARE SOLUTION

TopControl StatisticsWeights is an intuitive and unique software solution that provides a complete overview of the harvest and production process. In combination with all other TopControl solutions (Weighing, Labelling and Packaging Solutions) a maximum increase in productivity is guaranteed. At the touch of a button, StatisticsWeights generates user-defined reports that provide information about weight with giveaway, activities, performance data, sales forecasts and much more. All data is stored in real time on a local server and can be accessed at any time through intuitive dashboards. The recording of performance data enables optimal resource management and significant cost reduction.
